CONTENTS OF VOLUME 136

NUMBER 1, 5 JANUARY 1980

FERRO, D. R., MCQUEEN, J. E. Jr, MCCOWN, J. T. and HERMANS, J., Energy Minimizations of Rubredoxin 1

AKEY, C. W., MOFFAT, K., WHARTON, D. C. and EDELSTEIN, S. J., Characterization of Crystals of a Cytochrome Oxidase (Nitrite Reductase) from *Pseudomonas aeruginosa* by X-ray Diffraction and Electron Microscopy . 19

MATTHES, M. and DENHARDT, D. T., The Mechanism of Replication of ϕX174 DNA. XVI. Evidence that the ϕX174 Viral Strand is Synthesized Discontinuously 45

KADESCH, T. R., WILLIAMS, R. C. and CHAMBERLIN, M. J., Electron Microscopic Studies of the Binding of *Escherichia coli* RNA Polymerase to DNA. I. Characterization of the Non-specific Interactions of Holoenzyme with a Restriction Fragment of Bacteriophage T7 DNA . . . 65

KADESCH, T. R., WILLIAMS, R. C. and CHAMBERLIN, M. J., Electron Microscopic Studies of the Binding of *Escherichia coli* RNA Polymerase to DNA. II. Formation of Multiple Promoter-like Complexes at Non-promoter Sites 79

LETTER TO THE EDITOR

MARTIN, P. D., TULINSKY, A. and WALZ, F. G. Jr, Crystallization of Ribonuclease T_1 95

ANNOUNCEMENT 99

ERRATA. 101

NUMBER 2, 15 JANUARY 1980

Index to Volume 136

Actin binding sites, alternating, correlate with periodicity of α-helical potential in tropomyosin sequence, 199

Adenovirus type 2 early glycoprotein, synthesis and genomic site, 375

Akey, C. W., Moffat, K., Wharton, D. C. & Edelstein, S. J., Characterization of crystals of a cytochrome oxidase (nitrite reductase) from *Pseudomonas aeruginosa* by X-ray diffraction and electron microscopy, 19

Amino acid sequences, how they determine similar protein structures: the structure and evolutionary dynamics of the globins, 225

Analogue of the binding polynomial for the case of ligands binding to an aggregating macromolecule, 451

Asakura, S. (see also Nagashima, H.), 169

Axial packing in light meromyosin paracrystals, 343

Bacteriophage ϕX174 DNA replication mechanism: evidence that the ϕX174 viral strand is synthesized discontinuously, 45

— T7, chemical and functional quantitation of gene 0·3 messenger RNA during infection, 417

— — DNA, non-specific interaction of a restriction fragment with *Escherichia coli* RNA polymerase holoenzyme; an electron microscope study, 65

— — gene 0·3 messenger RNA, discrimination against translation, 433

Baldwin, J. M., The structure of human carbonmonoxy haemoglobin at 2·7 Å resolution, 103

Bardsley, W. G. (see also Woolfson, R.), 451

Binding of *Escherichia coli* RNA polymerase to DNA, electron microscopic studies; characterization of the non-specific interactions of holoenzyme with a restriction fragment of bacteriophage T7 DNA, 65

— — — — — — — — — — —; formation of multiple promoter-like complexes at non-promoter sites, 79

— polynomial, an analogue for the case of ligands binding to an aggregating macromolecule, 451

— sites, actin, alternating, correlate with α-helical potential in tropomyosin sequences, 199

Bloomer, A. C. (see also McLachlan, A. D.), 203

Bonnet monkey DNA, a dimer satellite sequence consists of distinct monomer subunits, 151

Bradley, R. D. (see also Herasymowych, O. S.), 193

Brennan, M. B. & Struhl, K., Mechanisms of increasing expression of a yeast gene in *Escherichia coli*, 333

Butler, P. J. G. (see also McLachlan, A. D.), 203

Carbonmonoxy haemoglobin, human, structure at 2·7 Å resolution, 103

Cech, T. R. & Karrer, K. M., Chromatin structure of the ribosomal RNA genes of *Tetrahymena thermophila* as analyzed by trimethylpsoralen crosslinking *in vivo*, 395

Chamberlin, M. J. (see also Kadesch, T. R.), 65, 79

Chemical and functional quantitation of gene 0·3 messenger RNA during T7 infection, 417

Chiu, C. C. & Magdoff-Fairchild, B., Deoxygenated sickle hemoglobin: phase transformation from fiber to a new monoclinic crystalline form, 455

Chothia, C. (see also Lesk, A. M.), 225

Chromatin: maturation of newly replicated chromatin of simian virus 40 and its host cell, 359

— structure of the ribosomal RNA genes of *Tetrahymena thermophila* as analyzed by trimethylpsoralen crosslinking *in vivo*, 395

Cloned *his*^{3} gene region of *Saccharomyces cerevisiae*, a physical, genetic and transcriptional map, 309

— yeast imidazoleglycerolphosphate dehydratase gene, a physiological study of functional expression in *Escherichia coli*, 291

Coat protein and RNA of tobacco mosaic virus, structural repeats and evolution, 203

Conjugal DNA transfer of the sex factor F, characterization of an *in vivo* system for nicking at the origin, 129

Creatine kinase and the 165,000 molecular weight component, ultrastructure studies on their binding to the M-band of muscle, 193
Crosslinking, trimethylpsoralen, used in *in vivo* analysis of the chromatin structure of the ribosomal RNA genes of *Tetrahymena thermophila*, 395
Crystalline form, monoclinic, new, a phase transformation from fibers in deoxygenated sickle hemoglobin, 455
Crystallization of ribonuclease T_1, 95
Crystals of a cytochrome oxidase (nitrite reductase) from *Pseudomonas aeruginosa*, characterization by X-ray diffraction and electron microscopy, 19
Cytochrome oxidase (nitrite reductase) from *Pseudomonas aeruginosa*, characterization of crystals by X-ray diffraction and electron microscopy, 19

Dark-field light microscopic study of the flexibility of F-actin complexes, 169
Davis, R. W. (see Struhl, K.), 291, 309
Deininger, P. L. (see also Rubin, C. M.), 151
Denhardt, D. T. (see also Matthies, M.), 45
Deoxygenated sickle hemoglobin: phase transformation from fiber to a new monoclinic crystalline form, 455
DNA, bonnet monkey, a dimer satellite sequence consists of distinct monomer subunits, 151
—, electron microscopic studies of the binding of *Escherichia coli* RNA polymerase; characterization of the non-specific interactions of holoenzyme with a restriction fragment of bacteriophage T7 DNA, 65
— — — — — — — — — — — — —; formation of multiple promoter-like complexes at non-promoter sites, 79
— of ϕX174, mechanism of replication: evidence that the ϕX174 viral strand is synthesized discontinuously, 45
— replication, rate of fork movement within a single mammalian cell, 339
— transfer, conjugal, of the sex factor F, characterization of an *in vivo* system for nicking at the origin, 129
Dimer satellite sequence in bonnet monkey DNA consists of distinct monomer subunits, 151
Discrimination, translational, against bacteriophage T7 gene 0·3 messenger RNA, 433

Early glycoprotein, adenovirus type 2, synthesis and genomic site, 375
Edelstein, S. J. (see also Akey, C. W.), 19
Electron microscopic studies of the binding of *Escherichia coli* RNA polymerase to DNA; characterization of the non-specific interactions of holoenzyme with a restriction fragment of bacteriophage T7 DNA, 65
— — — — — — — — — — — — —; formation of multiple promoter-like complexes at non-promoter sites, 79
Energy minimizations of rubredoxin, 1
Escherichia coli, mechanisms of increasing expression of a yeast gene, 333
— —, a physiological study of functional expression of the cloned yeast imidazoleglycerol-phosphate dehydratase gene, 291
— — RNA polymerase, electron microscopic studies of binding to DNA; characterization of the non-specific interactions of holoenzyme with a restriction fragment of bacteriophage T7 DNA, 65
— — — — — — — — — — — —; formation of multiple promoter-like complexes at non-promoter sites, 79
Everett, R. & Willetts, N., Characterization of an *in vivo* system for nicking at the origin of conjugal DNA transfer of the sex factor F, 129
Evolution and structural repeats of tobacco mosaic virus coat protein and RNA, 203
Evolutionary dynamics and structure of the globins; how different amino acid sequences determine similar protein structures, 225
Expression, functional, in *Escherichia coli*, of the cloned yeast imidazoleglycerolphosphate dehydratase gene, 291
— of a yeast gene in *Escherichia coli*, mechanisms of increase, 333

F-actin complex flexibility, a dark-field light microscopic study, 169
Fanning, E. (see also Klempnauer, K.-H.), 359
Ferro, D. R., McQueen, J. E. Jr, McCown, J. T. & Hermans, J., Energy minimizations of rubredoxin, 1

Fibers in deoxygenated sickle hemoglobin transform to a new monoclinic crystalline form, 455
Flexibility of F-actin complexes, dark-field light microscopic study, 169
Fork movement rate and DNA replication within a single mammalian cell, 339
F-specific nicking at the origin of conjugal DNA transfer, 129
Functional expression in *Escherichia coli* of the cloned yeast imidazoleglycerolphosphate dehydratase gene, a physiological study, 291

Gene, *his*3, cloned, of *Saccharomyces cerevisiae*, a physical, genetic and transcriptional map, 309
—, imidazoleglycerolphosphate dehydratase, cloned yeast, a physiological study of functional expression in *Escherichia coli*, 291
— 0·3 messenger RNA, bacteriophage T7, discrimination against translation, 433
— — messenger RNA, chemical and functional quantitation during T7 infection, 417
—, yeast, methods of increasing expression in *Escherichia coli*, 333
Genes, ribosomal RNA, of *Tetrahymena thermophila*, chromatin structure as analyzed by trimethylpsoralen crosslinking *in vivo*, 395
Genetic, physical and transcriptional map of the cloned *his*3 gene region of *Saccharomyces cerevisiae*, 309
Genomic site and synthesis for an early adenovirus type 2 early glycoprotein, 375
Globins, structure and evolutionary dynamics; how different amino acid sequences determine similar protein structures, 225
Glycoprotein, early, adenovirus type 2, synthesis and genomic site, 375

Haemoglobin, carbonmonoxy, human, structure at 2·7 Å resolution, 103
—, deoxygenated sickle: phase transformation from fiber to a new monoclinic crystalline form, 455
—, mammalian, regulation of oxygen affinity, 183
Haems of deoxy and oxyhaemoglobin, Raman spectra study of quaternary structures and low frequency molecular vibrations, 271
α-Helical potential in tropomyosin sequence, the periodicity correlates with alternating actin binding sites, 199
Herasymowych, O. S., Mani, R. S., Kay, C. M., Bradley, R. D. & Scraba, D. G., Ultrastructure studies on the binding of creatine kinase and the 165,000 molecular weight component to the M-band of muscle, 193
Hermans, J. (see also Ferro, D. R.), 1
*his*3 gene region, cloned, of *Saccharomyces cerevisiae*, a physical, genetic and transcriptional map, 309
Houck, C. M. (see also Rubin, C. M.), 151
Human carbonmonoxy haemoglobin, structure at 2·7 Å resolution, 103

Imai, K. (see also Peruts, M. F.), 183
Imidazoleglycerolphosphate dehydratase, a physiological study of functional expression in *Escherichia coli* of the cloned yeast gene, 291
